Tuesday February 7, 2017

9:00 am– 11:00 am

Myrtle Beach Area Chamber of Commerce
1200 N Oak St Myrtle Beach, SC

Do you interact with the public and visitors to Myrtle Beach? Do you get questions about water quality that you can't answer? This workshop can help you understand what our local water quality issues are, how our water is tested, and where that information and results can be found. You will also have the chance to ask questions of a group of local water quality experts on what is being done locally to protect water quality and public health, and how to share that information.

Speakers will be from SC Department of Health and Environmental Control (DHEC) Bureau of Water, Coastal Carolina University, Horry county Stormwater, and the University of South Carolina

Who Should Attend: Staff at businesses that interact and communicate with the public, especially with visitors to the myrtle beach area.

This event is co-sponsored by the North Inlet-Winyah Bay National Estuarine Research Reserve and the University of South Carolina with the support of the Myrtle Area Hospitality Association and Chamber of Commerce.
